Nigeria (WAT, UTC+1) | Available for remote roles

PROFILE

Machine Learning Engineer and Data Scientist with hands-on experience building and deploying predictive models, NLP systems, and data-driven applications. Proficient in Python with a track record of delivering end-to-end ML solutions across healthcare, security, education, and language technology domains. Particular experience working with low-resource and multilingual text data including African languages. Available for full-time remote roles and freelance projects.

SKILLS

Programming: Python, SQL

ML & AI: Scikit-learn, TensorFlow, Keras, HuggingFace Transformers, Neural Networks, XGBoost

NLP: Text Classification, Sentiment Analysis, TF-IDF, Fine-tuning, Multilingual Modelling

Data: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Data Cleaning

Deployment: Flask, Django, Streamlit, REST APIs

Productivity & Office: MS Word, MS Excel, MS PowerPoint, Google Sheets, Google Apps Script

Tools: Git, GitHub, Jupyter, VS Code, PostgreSQL

EXPERIENCE

Machine Learning Engineer | Freelance (Remote) Feb 2022 – Present

- Built and deployed a Kinyarwanda hate speech and sarcasm detection platform using AfriBERTa-mini transformer, serving community moderators with role-based dashboards and explainable predictions. Reduced manual moderation workload by automating content flagging.
  Technologies: Python, Flask, HuggingFace Transformers, Scikit-learn, NLP
- Developed a multilingual sentiment analyzer supporting English, Yoruba, and Nigerian Pidgin across 3 typologically distinct languages, handling code-switching and low-resource language challenges.
  Technologies: Python, HuggingFace Transformers, Multilingual Modelling
- Delivered 10+ client ML projects including churn prediction, dry bean classification, spam detection, and sentiment analysis with full documentation and deployment.
  Technologies: Python, Scikit-learn, Flask, TensorFlow, Pandas, NumPy

Data Entry and ICT Officer | Buven Communications Nigeria Ltd, Akure, Ondo State Jan 2025 – Present

- Retained after NYSC to manage business premises and contractor registrations on the Ondo State tax portal, processing 200+ records monthly with 100% compliance to state documentation standards.
  Technologies: MS Excel, MS Word, Data Entry Systems

Data Entry and ICT Officer (NYSC) | Ministry of Commerce, Industries and Cooperative Societies, Akure, Ondo State Jan 2025 – Dec 2025

- Completed one-year national service posting, processing business premises and contractor records on the Ondo State Business Premises Registration portal.
  Technologies: MS Excel, MS Word, Data Entry Systems

Software Automation Engineer | Crown Polytechnic, Ado-Ekiti Sept 2025 – Jan 2026

- Developed automated ethical clearance certificate system, reducing certificate generation time by eliminating manual document creation for 100+ researchers.
  Technologies: Google Sheets, Google Docs, Google Apps Script, Gmail

Software Automation Engineer | Bamidele Olumilua University of Education, Science and Technology (BUESTI), Ikere-Ekiti Aug 2024 – Dec 2025

- Built end-to-end automated research compliance workflow integrating Google Forms, Sheets, Docs, and Apps Script, eliminating manual data entry for research administration staff.
  Technologies: Google Sheets, Google Docs, Google Apps Script, Google Forms

---

NOTABLE PROJECTS

Kinyarwanda Hate Speech & Sarcasm Detection

- Fine-tuned AfriBERTa-mini on Kinyarwanda text for hate speech and sarcasm classification. Full Flask deployment with role-based dashboards, flagged content monitoring, rate limiting, and explainable predictions.
  Technologies: Python, Flask, HuggingFace Transformers, AfriBERTa, Scikit-learn, NLP

Multilingual Sentiment Analyzer

- Sentiment analysis system supporting English, Yoruba, and Nigerian Pidgin. Addressed code-switching, non-standard orthography, and scarce labelled Pidgin data through transfer learning strategies.
  Technologies: Python, HuggingFace Transformers, NLP, Multilingual Modelling

Malaria Diagnosis with Neural Networks

- Benchmarked MLP and RBF neural network models to diagnose malaria from clinical datasets, comparing architectures for accuracy and reliability under limited data conditions.
  Technologies: Python, TensorFlow, Scikit-learn, MLP, RBFN, Neural Networks, Streamlit

Ransomware Detection System

- Real-time ransomware classifier using Random Forest on PE file features with live file system monitoring and Arduino hardware alerts for proactive threat detection.
  Technologies: Python, Streamlit, Scikit-learn, Random Forest, PE file analysis, Arduino

IGA HIFADHI: Student Subject Recommendation System — Client Project, Kigali, Rwanda

- Web platform recommending academic subjects to Rwandan students based on IQ assessments, personality profiling, and compatibility scoring. Deployed for a live client.
  Technologies: Python, Django, Scikit-learn, PostgreSQL, Recommendation Systems, HTML/CSS, JavaScript

Text-Based Emotion Detection — Final Year Thesis, Federal University Oye-Ekiti

- Supervised ML pipeline classifying 13+ emotion categories from text using TF-IDF and Random Forest with full preprocessing, feature engineering, and evaluation.
  Technologies: Python, Scikit-learn, Random Forest, TF-IDF, Streamlit, NLP

Spam Classification Systems

- SMS spam detection using Random Forest and email spam filtering using Multinomial Naive Bayes, both with TF-IDF preprocessing, achieving high precision and recall.
  Technologies: Python, Scikit-learn, Random Forest, Naive Bayes, TF-IDF, NLP

Churn Prediction & Dry Bean Classification — Client Projects

- ML solutions for customer churn prediction and multi-class agricultural product classification with full documentation and deployment.
  Technologies: Python, Scikit-learn, Pandas, NumPy, Data Visualization, ML Pipelines

---

EDUCATION

BSc. Computer Science Jan 2019 – Aug 2024
Federal University Oye-Ekiti, Nigeria
CGPA: 3.79 / 5.0 (Second-Class Upper Division)

CERTIFICATIONS

- GDSC & I4G Data Science Bootcamp
- Forage BCG X Data Science Job Simulation
- LearnTube Certified Machine Learning Core Essentials
- Google Coursera — Crash Course on Python
- SkillUp by SimpliLearn — PostgreSQL

LANGUAGES

English (fluent) | Yoruba (native) | Nigerian Pidgin (fluent)
